

“MathsBuddy Works”

MathsBuddy is an online Mathematics teaching and learning resource. It is available on:

- ✓ Computer
- ✓ Ipad
- ✓ Other tablets and electronic devices

“MathsBuddy Works” because it is designed to:

- raise the self-confidence level of every student who engages in it, by allowing students to learn **at their own pace by providing students with a “Video Tutorial for Every Maths Concept”**

This because students are able to:

- rewind, fast forward and repeat the lesson, as often as needed
- stop, reflect, ask questions and absorb the content in their own time, at their own pace
- being able to revise and catch up on missed work easily,

MathsBuddy is aligned to the New Zealand curriculum, Years 1-13.

In addition to providing great benefits to students, MathsBuddy also provides the opportunity for parents to become more familiar with the current Mathematics curriculum and to have access to the same information as the teacher regarding the progress and development of their child.

This will enable them to actively support their child’s Mathematics education.

Subscribing to MathsBuddy will provide complete access to video tutorials covering every concept in the New Zealand Mathematics curriculum, available from anywhere and at any time.

This will provide access to MathsBuddy until 31st January 2022.
